Re: FORT WILLIAM FIRST NATION ECONOMIC DEVELOPMENT PLAN

Fort William First Nation (FWFN) has engaged MNP LLP to assist in the development of a 5 year Economic Development Plan.

The purpose of this engagement is to develop an Economic Development Plan that will guide FWFN through the period April 1st, 2014 through March 31st, 2019. The work is to be completed by MNP and the FWFN project team and will consist of multiple phases that will come together in creating this plan for future economic development for FWFN. First of all, the project team intends to gain a full understanding of the current situation. In addition to research by the team, they will be consulting with FWFN members, industry experts and other First Nation organizations; this information will then be used to look forward to develop a plan and focus that best serves FWFN.

A key step in this process will be gathering valuable input from the FWFN community members and stakeholders of FWFN and understanding their priorities and preferences for growing economic opportunities.

More information regarding the consultation process will be available in the near future and we look forward to the community's participation.

MNP LLP is one of Canada's leading advisory and chartered accountancy firms. MNP builds strong client relationships by providing a wide range of consulting, tax and accounting services to their clients. They serve more First Nations across Canada and provide more services to First Nations than any other firm in the country (See MNP and www.mnp.ca).
