

# IMAGENATION

Indigenous Youth Mentorship Program

## ImaGENation

### (Imagine-Nation)

A new clean energy capacity-building program for Indigenous youth has officially **launched!**

ImaGENation is a mentorship program that supports Indigenous youth to launch their own clean energy project grounded in cultural identity, guidance, and peer-to-peer support.

Beginning in September 2021, 10 teams of Indigenous youth (ages 18-30) will be selected and enrolled into an 18-month program that provides technical mentorship, coaching, cultural support, and a **guaranteed \$10,000 project award** to bring a clean energy project idea to life.

If you are an **Indigenous youth** between the ages of **18-30** with a clean energy project idea, we want to hear from you!

Indigenous youth will develop skills in the area of:

- Indigenous Clean Energy Leadership
- Project Planning and Management
- Community Engagement
- Partnership Outreach
- Energy and Financial Literacy
- Collaboration and Networking

Facilitated in partnership between **SevenGen**, **Indigenous Clean Energy (ICE)**, and **Student Energy**.

ImaGENation's ecosystem of support can assist any young Indigenous person on their path to becoming an energy leader.
